REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a method for providing data for a data table in a controller configured to process data from a system having at least one parameter with a value that can be measured, the data table having a plurality of data cells being defined by a row and a column and comprising reading a value from a first data cell in the data table, the first data cell corresponding to current conditions of the system; determining respective target values for at least some data cells in the data table, the at least some data cells including the first data cell, each of the respective target values being a function of at least the determined error and the value read from the first data cell; and selectively modifying data values in the at least some data cells based on the respective target values. These limitations are neither taught nor obvious by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
